

# United Continental Artists<sup>®</sup>

International Music Project by Steven Richmann & Universal Uniques<sup>®</sup>

## **A Mallywood Films & Music Ltd. Production**

Due to the corona virus crisis and the associated restrictions in normal everyday life, an idea was born. A charity song was to be created, the income of which benefits families and people who get into economic distress due to the corona crisis. Normally such songs are made with well-known artists, also to have the presence that there is income. But UNIVERSAL UNIQUES<sup>®</sup> as part of the music publishing company and the record company MALLYWOOD FILMS & MUSIC LTD. had another idea. UNIVERSAL UNIQUES<sup>®</sup> had the idea to have artists who had introduced themselves to the record company and who had the appropriate technical equipment, make vocal recordings at their homes. Now of course one has to imagine that these artists are at home on many different continents. These include North America, Europe and also Asia.

In cooperation with the composer Steven R. the song "Sound of Life" was chosen. The idea behind it was that we wanted to realise the song a bit different and more striking. So that it stands out from the current typical music landscape, which is on the radio airplays at the moment. The song should not be a "follower". It should be a special musical work with special artists and music creators. This song was then sent to the participating artists. Together with the A&R management, the individual vocal tracks were then delivered to the recording studio and then worked into the instrumental piece by piece. The result is a song that's emotionally, adapts to the modern musical landscape and produces voices that are each unique. And together they make this song a milestone.

Especially for this release the project UNITED CONTINENTAL ARTISTS<sup>®</sup> was created, which will also stand for other projects. Further projects are planned with many new artists worldwide, who will then record songs together.

**All listed artists, the composer, the producer and the record company** have agreed that all proceeds from this project will be donated to an aid fund (similar to a foundation) that supports people who have fallen into economic hardship due to the coronavirus crisis.

As the record company has agreed with the distribution and online music dealers to pay out the proceeds monthly, quick help can be provided. At the moment, the cooperation with some serious organisations is being examined in order to be able to handle this aid.
